Ahmed Salih
Frontend Engineer

About Me
Summary:

   I'm a general software engineer who usually uses the **MERN** Stack with experience in the front-end, in the back-end, not only but also gained some experience in mobile applications development (not big exp. but willing to).

All this in various languages and technologies like *ES6+ and (Typescript), Reactjs, React Native, Nodejs, MongoDB, Expressjs, Sass.*

But mainly I'm working as a Frontend developer. Who built a lot of web applications using web technologies like *Bootstrap (react-bootstrap), Reactjs, Gatsbyjs, Gulp, Pug/Jade, Sass, Ajax, Webpack*

One of the other technologies I used before is *Docker. And built some simple CI/CD pipelines with help of Circles, Travis*

Technical Experience
Projects:

Stalkme

https://github.com/salihcodev/stalker-web

https://github.com/salihcodev/stalker-server
